Education

Software engineering, Addis Ababa Science and Technology University

06/2022 – 08/2027

Addis Ababa

- CGPA: 3.93/4.00 – Consistently on the President's List for academic excellence.
- Relevant Coursework: Data Structures & Algorithms, System Design & Analysis, Distributed Systems, Networking, Computer Security, Object-Oriented Programming (Java), Programming (C++)

Coding Academy, Africa to Silicon Valley (A2SV) – Backed by Google

01/2025 – 09/2025

Addis Ababa, Ethiopia

- Completed an intensive software engineering program at Africa's leading tech academy (A2SV), joining a selective talent pool with 100+ offers to top tech companies including Google, Amazon, and Bloomberg.
- Mastered advanced data structures, algorithms, and system design by solving 700+ problems on LeetCode & Codeforces and collaborating on real-world projects at Eskalate.

Professional Experience

Software Engineer, Intern, Eskalate LLC, Africa to silicon valley

06/2025 – 08/2025

Addis Ababa, Ethiopia

- Built a Flutter-based e-commerce application using Clean Architecture and BLoC pattern, implementing secure authentication, full CRUD product management (add, view, edit), and a real-time chat system.
- Developed core app features including product management, user authentication, and Socket.IO -based chat, enhancing user interactivity and simplifying product updates for managers.
- Worked closely with the backend team to integrate and optimize REST APIs, which led to smoother data handling and faster screen load times in testing environments.

Projects

LawGen – AI-Powered Legal Assistance Tool

07/2025 – 08/2025

- Collaborated in a 14-member cross-functional team, leading contributions within the 4-member mobile team to build an AI-powered app that improves legal literacy in Ethiopia by summarizing laws in Amharic/English.
- Collaborated with backend engineers to align API contracts and address integration challenges early, which significantly reduced the time spent on debugging and improved overall development flow.
- Ensured modular, testable, and maintainable code across all features, achieving 90% crash-free sessions during final testing and enabling citizens to access 150+ legal texts and quizzes in Amharic/English without errors.

Student Focus App

04/2025 – 05/2025

- Built a full-stack productivity web app using Next.js that helped students develop focus habits and track progress.
- By integrating streak counters, Pomodoro timers, and habit logs, the app increased study streak consistency by 25% within the first month of use, with students reporting an average of 20 additional minutes of focused study time per day.
- Designed and integrated focus session modes, a Pomodoro timer, and a calendar-based tracker, enabling users to record and analyze 100% of their study time across sessions.

Skills

Programming Languages

C++, Java, Python, JavaScript, Dart, PHP, SQL

Frameworks & Libraries

React, Next.js, Express.js, Flutter, TailwindCSS

Tools & Platforms

Git, GitHub, GitLab

Achievements

- Received multiple Presidential Awards from the University President for exceptional academic performance.
- Ranked among the Top 1% of 1,200+ students across all departments, demonstrating consistent academic excellence and dedication.
- Recognized for Leadership and Community Service as Student Parliament President, earning 15+ certificates from schools and clubs for mentoring, teaching, and organizational contributions.
